

NETWORKING & SYSTEM ADMINISTRATION LAB**Name: VISHNU MOHAN****Roll No: 51****Batch: B****Date: 18/04/2022****Experiment No.: 1****Aim**

Read a matrix from the console and check whether it is symmetric or not.

Procedure

```
import java.util.Scanner;
```

```
class Main{
```

```
    public static void main(String args[]){
```

```
        int row, col;
```

```
        Scanner sc= new Scanner(System.in);
```

```
        boolean isSymmetric= true; //for boolean statement true or false
```

```
        System.out.print("Enter the number of rows : ");
```

```
        row= sc.nextInt();
```

```
        System.out.print("Enter the number of columns : ");
```

```
        col= sc.nextInt();
```

```
        int[][] matrix= new int[row][col];
```

```
        System.out.println("Enter the elements : ");
```

```
        for(int i=0;i<row;i++){
```

```
            for(int j=0;j<col;j++){
```

```
                matrix[i][j]= sc.nextInt();
```

```
            }
```

```
        }
```

```
        System.out.println("\n");
```

```
System.out.println("The entered matrix is : ");
for(int i=0;i<row;i++){
    for(int j=0;j<col;j++){
        System.out.print(matrix[i][j]+" ");
    }
    System.out.println("\n");
}

for(int i=0;i<row;i++)
{
    for(int j=0;j<col;j++)
    {
        if(i!=j)
        {
            if(matrix[i][j]!=matrix[j][i])
            {
                isSymmetric= false;
                break;
            }
        }
    }
}

if(!isSymmetric)
    break;
}

if(isSymmetric)
{
    System.out.println("The entered matrix is Symmetric ");
}
else
{

```

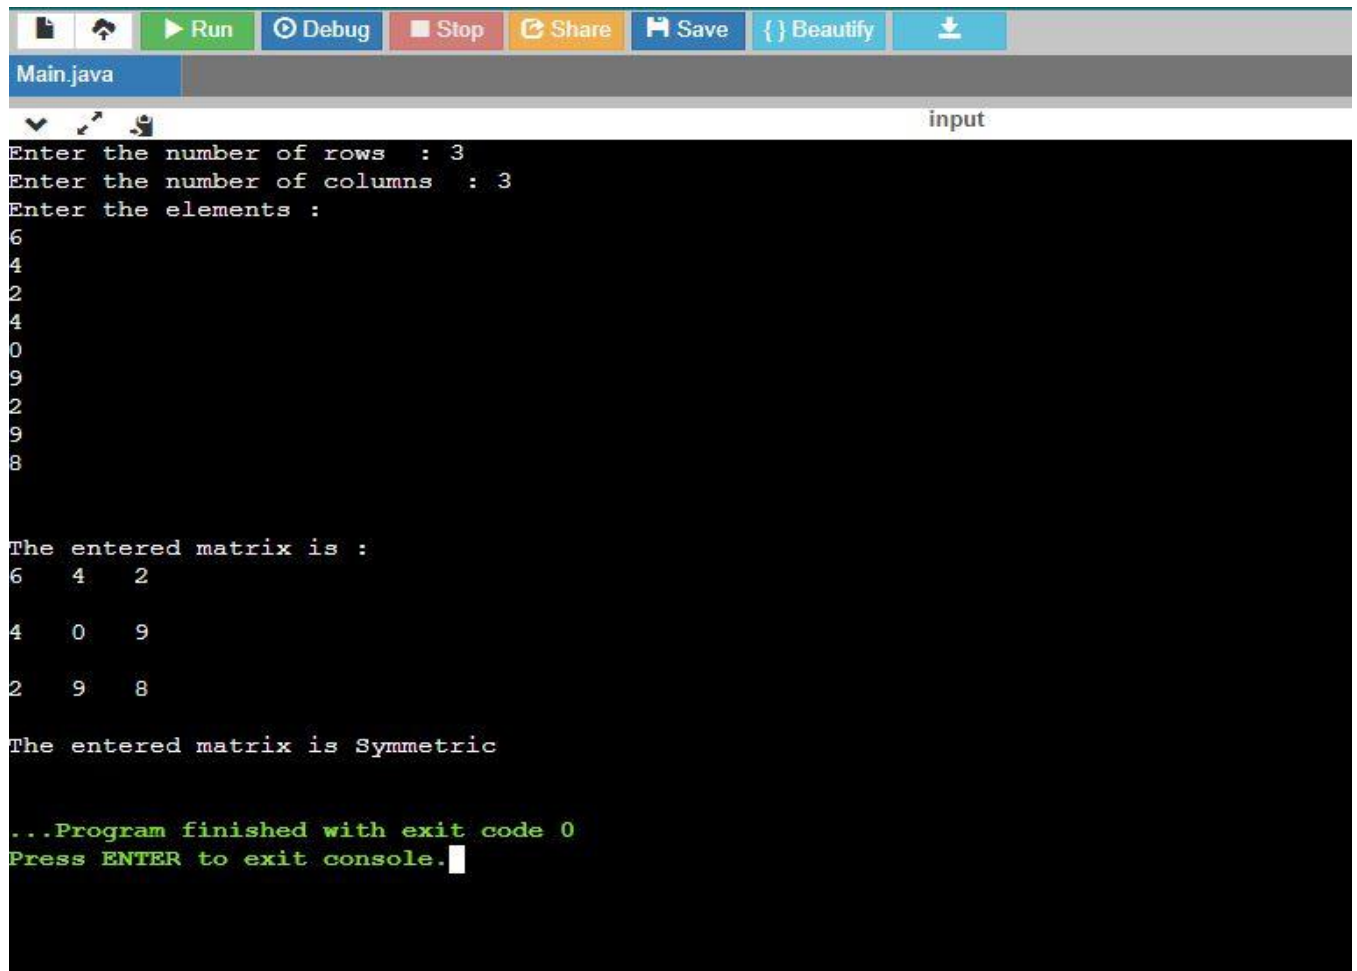

```
System.out.println("The entered matrix is not a Symmetric ");
```

```
}
```

```
}
```

```
}
```

Output Screenshot

```
Main.java
input
Enter the number of rows : 3
Enter the number of columns : 3
Enter the elements :
6
4
2
4
0
9
2
9
8

The entered matrix is :
6  4  2
4  0  9
2  9  8

The entered matrix is Symmetric

...Program finished with exit code 0
Press ENTER to exit console.
```
